LESLIE A. OSBORN M.D.  
4217 WANETAH TRAIL  
MADISON 5, WISCONSIN

February 22, 1959

Dear Josh and Esther,

We will be coming your way much sooner than we had expected, and are in hopes that it will not be while you are in Italy. Dora and I will both be attending the American Orthopsychiatric Association meeting in San Francisco on March 31, April 1 and 2, and will be visiting friends in Santa Rosa before returning on the next Saturday. We plan to fly in to Los Angeles and take the train tripp up the coast.

We are hoping to see you, and will very much enjoy hearing about your new setting. It must be a great relief to be settled again - though it is to be expected you will be asked to travel a lot.

I would be interested in seeing the medical school and learning more of the new program being developed, and could plan the Thursday for this if convenient. If the School has any interest in me, this also would be a chance to look things over both ways; I infer from the long time that has elapsed since you forwarded my curriculum that the position has been filled, or some other kind of background is sought.

We have been exceptionally busy. The winter has continued very cold or very snowy or both; we have never had so much piled up, and it is the severest winter since 1912. I have been on WISC-TV the past six weeks on Saturdays, and we have had a chance to document what we have been doing in our mental hygiene program. The last five have been filmed, and have been excellently received. The station intends to submit them to the President of the NBC, and considers it probable they will be considered for national use.

We were so pleased you found time in the hurry of final moving details to spend the evening with us and the Australians - going and coming.

Here's hoping everything is working out to your satisfaction, and we'll keep our fingers crossed until we learn of your plans for just after Easter.

Sincerely yours

Leslie
